SOME OF MY PROJECTS

LINK Group Company B2E Portal

*Worked on developing a large, multi-page B2E company portal
Developed new pages with HTML, CSS, JS and WordPress
Implemented new features*

LINK E-Learning Platform

*Worked on a brand new platform for LINK E-Learning system
Coded new single pages from scratch using HTML, CSS, JS
Updated and improved existing pages*

LINK Group CSS Framework - LINK CSS

Planned and coded a custom CSS framework for LINK Group

Used SASS and BEM Methodology to create custom classes for quick developing

Responsive classes for flex and grid layouts, custom classes for spacing properties and styles

Made full reusable components

Movie Web Application With React JS

Single page application made with create-react-app and MovieDB API

Routing between pages is done using react-router

User can see Most Popular, Upcoming and Top Rated movies, as well

as search for a specific movie and get more info about it

Cornelius & Cylinder Restaurant Website

Developed in HTML, CSS and JavaScript. Website consists of multiple pages

including a main page, an interactive menu page with food images and a picture

Gallery.

Shake It

Single page application made Vue JS

User can store his shake recipes, edit the ingredients, delete them and add new ones

Application stores real data with Firebase database
